

## AX12 ARAI Motorcycle Visor Insert

**IMPORTANT NOTE:** Due to the size of the AX12 ARAI insert, this sizing template *will not* accurately print to size on Letter-size paper (8.5x11). It is advised to use either Legal (8.5 x14) or Ledger (11 x 17) size paper for a correct print of the template. Printer variations may cause differences to actual measurements. **Do not SCALE or FIT to page, but print ACTUAL SIZE.**

- 1) Print .pdf and measure with a ruler to verify the print matches the insert dimensions listed above.
- 2) Cut to the outside edge of the black line.
- 3) With your helmet faceshield down and fully closed, center the print of the insert on the inside surface of the faceshield. Align the print within the perimeter of the helmet portal so it fits within the opening.

**⚠** The Akari® AX12 ARAI may not be compatible with all helmets and faceshields, such as various dual-sport & modular helmets.
